

MOBIQ: FOR COMPLETE ASSET & STOCK VISIBILITY

- > ACROSS DEPOTS, WAREHOUSES & VANS
- > ASSET TRACKING, INSPECTIONS & COMPLIANCE
- > IDEAL FOR LOLER, PUWER, PSSR, & MORE
- > FULL STOCK VISIBILITY & CONTROL
- > AUTOMATIC, REAL-TIME UPDATES
- > ONE INTUITIVE SYSTEM
- > READY TO USE FROM DAY ONE

As businesses grow, so does the complexity of managing assets, stock, and equipment across multiple locations. Without a central system, information can quickly become fragmented – assets are difficult to locate, inspections are missed, stock levels are unclear, and valuable time is spent searching for records, parts or tools. Whether equipment is stored in warehouses, depots, vehicles, or out in the field, maintaining visibility and control becomes increasingly difficult.

MobiQ is BOWE IQ's answer to these challenges. Used by service engineers, warehouse teams, or field-based staff, the easy-to-use mobile app provides instant access to jobs, tools, parts, assets, their history and inspection requirements – while managers gain complete visibility through live dashboards, reports, workflows, and operational visualisations.

MobiQ's end-to-end view of equipment, tools, and safety-critical assets also helps organisations stay on top of compliance requirements and provide clear audits when needed.

THE MOBIQ APP IN ACTION

From laptops to lifting slings, logistics boxes to cages, tooling to lab equipment, orders to maintenance tasks, companies can use MobiQ to:

- > **SCAN** > **TRACK** > **INVENTORY CHECK** > **LOCATE** > **COUNT**
- > **ADD/TAG** > **MOVE** > **INSPECT** > **DECOMMISSION**

GETTING STARTED

Logging in is simple – username and password – and in-app permissions are easily assigned to each user. Navigating the app is straightforward and intuitive, mainly swiping through the available menus and tapping the options shown. For scanning, there is a toggle button, so one tap is all it takes to switch the scanning mode between RFID and barcode.

WAY MORE THAN TRACKING!

For employees on the shop floor, in the production hall or out in the field, MobiQ puts everything they need at their fingertips, delivering clear instructions and guidance straight to their handheld device – while at the same time tracking the real-time flow of assets, parts, tools, and stock.

MobiQ = the answer to hundreds of questions

Quickly, accurately, and without paperwork!

- > What's my schedule today?
- > What tools & parts do I need?
- > What's already in my van/at my workstation?
- > Where are the other items located?
- > What is due for inspection?
- > What preventive maintenance needs carrying out?
- > What did the previous report say?
- > And many more!

TRACK. INSPECT. PROVE.

MobiQ helps organisations stay compliant with statutory inspection and maintenance requirements and other regulatory frameworks. By providing a complete digital record of assets, inspections, certifications, defects, and corrective actions, MobiQ ensures critical equipment is inspected on time, maintained correctly, and fully auditable. It also supports the collection and management of information needed for Digital Product Passports, a legal requirement for all products sold in the European Union from January 2027.

IDEAL FOR:

- > LOLER (Lifting Operations and Lifting Equipment Regulations)
- > PUWER (Provision and Use of Work Equipment Regulations)
- > PSSR (Pressure System Safety Regulations)
- > Plus countless other inspection and compliance processes

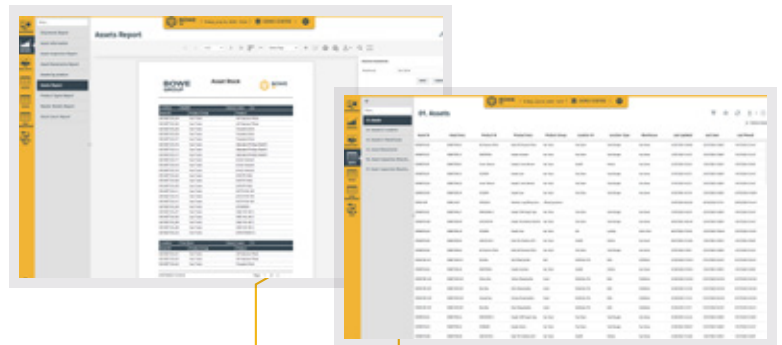

LIVE VISIBILITY FOR BETTER DECISIONS

While shopfloor and field workers are guided through their tasks using the MobiIQ mobile app, managers gain complete visibility through the VisIQ web platform that powers it. By consolidating live data from multiple sources, VisIQ provides a single source of truth for your operations. From here, dashboards, reports and visualisations can be tailored to your specific requirements, giving decision-makers instant access to the information they need.

- > Customisable dashboards
- > Traditional grids
- > Powerful reporting tools
- > Real-time visualisations of automation, production and shop-floor activity
- > No-code workflow design features

The result is greater operational visibility, faster decision-making, and a more agile organisation that can respond confidently to changing demands.

A ONE-STOP-SHOP APPROACH

BOWE IQ isn't just software – we also supply a wide range of hardware for your tracking systems, such as:

- > RFID portals
- > Handheld RFID readers
- > Printers, labels, & tags
- > Smart antennas.

Live, interactive demos of MobiIQ and our hardware range are available too – please get in touch to book:
